ADVANCED AESTHETIC RHINOPLASTY, OTOPLASTY, AND FACIAL CONTOURING. 2015

An international symposium on plastic surgery
The third live surgery and injections course in St.Petersburg, Russia
October 23–25, 2015

The three day event will include surgeries and non-surgical procedures with expert commentary.
The procedures will be performed in the operating rooms of Atributeaute Clinique in St.Petersburg, Russia, and **broadcast live** at the [venue](#) of the symposium.

We are glad to welcome you at our Advanced Rhinoplasty, Otoplasty, and Facial Contouring Course. In accordance with our original vision, this self-contained event is also a follow-up to the similar course we organized last year. We intentionally broke the programme down into two parts in view of the complexity of the subject matters and our desire to invite more speakers. We wanted to cover the general aspects of modern rhinoplasty, otoplasty, and facial contouring in 2014, and get into the details of the relevant technical innovations in 2015. This time, we will also focus on complications, their prevention and treatment. On top of that, this year we inaugurate a dissection course where facial anatomy will be covered in detail. We hope you will enjoy it. Our course will be built, like before, around live surgery and contouring procedures to be performed by some of the top experts in the industry.

I hope you will find the course a pleasure to attend, and glean an abundance of useful knowledge from the various presentations we have prepared for you. Make sure to sign up for our 2016 event as well. New topics will be covered, and the programme will be even more exciting.

Thank you for joining us!

Best regards,
Dr. Vitaly Zholtikov,
Course Director
